

AMENDMENTS TO THE SPECIFICATION

Please replace the present title with the following amended title:

**ELECTROLUMINESCENCE DEVICE HAVING PHOSPHOR PARTICLES WHICH
GIVE DONOR-ACCEPTOR TYPE LUMINESCENCE**

Please insert the following paragraphs after line 1, page 8 of the specification:

Fig. 2 is an explanatory view showing an example of a particle 1 having a non-luminous shell 2.

Fig. 3(a) is a photomicrograph of particles having stacking faults. The length between white dots corresponds to 10 μm .

Fig. 3(b) shows transmission electron micrographs of cross sections of particles having stacking faults. The length of the white line in the lower portion to the right corresponds to 50 μm .
